Evolving the Microsoft Partner Network programs

The world and how we work is rapidly changing. The opportunities for Microsoft partners—whether you build and sell services, software solutions, or devices—are significant. As the capabilities required by our customers have evolved, our partner programs must also evolve to meet that demand.

In this walking deck, we've outlined changes to the Microsoft Partner Network programs—focused on simplifying our programs, delivering greater customer value, investing in your growth in new ways, and recognizing how you deliver customer value.

Partnering with Microsoft

Our partners have access to a variety of opportunities with the Microsoft Cloud to innovate, scale, and differentiate the types of solutions they provide—empowering people across their work and digital lives.

Cloud Innovation

Through the Microsoft Cloud, partners drive innovation that is relevant to people and organizations around the world, leaving lasting impact.

Differentiation

Partners can build differentiated solutions based on the unique technical extensibility, secure foundation, and the broadest business model.

Scale

Partners can quickly scale with our unique go-to-market approach and the Microsoft commercial marketplace that connects millions of customers around the globe.

Future state of the Microsoft Cloud Partner Program

General
Availability
October 3, 2022

- Microsoft Partner Network is evolving to the **Microsoft Cloud Partner Program**.
- We are simplifying our Microsoft Network programs. We will move away from silver and gold legacy competencies and anchor to six, single tier Solutions Partner designations aligned to the Microsoft Cloud.
 - Business Applications, Data & AI (Azure), Digital & App Innovation (Azure), Infrastructure (Azure), Modern Work, Security
- Advanced specializations renamed to specializations.
- To attain the new Solutions Partner designations, partners will need to demonstrate their organization's capability in 1) performance 2) skilling and 3) customer success (as measured by the **partner capability score**).
- Partners have access NOW to the partner capability score dashboard in Partner Center that shows how each partner is tracking towards new designations and where they can take action to increase their score.
- As partners attain the new designations from October 2022, they'll have the choice to move to updated benefits or retain their legacy benefits.

As part of these changes, we are not removing the benefits partners receive today; partners who attain a Solutions Partner designation will have access to additional benefits and investments.

Focusing on customer needs and your growth

We want to help you grow a profitable business and to continue to deliver successful customer outcomes.

Simplifying our programs

A new single tier Solutions Partner designation, aligned to six solution areas and the Microsoft Cloud.

Demonstrate your organization's capabilities in delivering customer success aligned to how Microsoft goes to market and where there is customer demand.

Delivering greater customer value

Introducing a new partner capability score that holistically measures your organization's technical capabilities to drive customer success.

Investing in your growth in new ways

We are making investments to help encourage business development, increase customer reach, and expansion through technical skilling and enablement.

You have time to prepare

We are providing you with six months' notice before these changes begin. Start now and review what these changes mean for your organization and assess how they align to your strategic business plans.

We are simplifying our Microsoft Network programs

We are introducing the Solutions Partner designation, anchored on the Microsoft Cloud in six solution areas aligned to how Microsoft goes to market.

These changes will act as a catalyst boost in the future for partner capability to sell through and sell with Microsoft.

Admins can sign into [Partner Center](#) to see how your organization is progressing towards a Solutions Partner designation.

Solutions Partner designations

The Solutions Partner designation becomes the first opportunity for you to set yourself apart from the competition by demonstrating your organization's breadth of capabilities aligned to solution areas. That's valuable for you, because it's where we see customer demand, and where the opportunity is for partners to scale to meet customer needs.

Easily identifiable

Customers want to work with partners who have a deep knowledge and expertise.

A Solutions Partner designation identifies partners with specific capabilities and experiences in high customer demand solution areas.

Choose one or more

Partners can choose to earn one Solutions Partner designation, or more, if applicable to your organization.

Once you attain a Solutions Partner designation, subsequent designations can be attained, after requirements are met, with no additional fee.

Opportunity

There are significant opportunities for partners in this new world of work—whether you build and sell services, software, or devices.

We are introducing a new, holistic partner capability score

Partners need a minimum of 70 points out of a possible 100 points to attain a Solutions Partner designation.

Holistic qualifications will measure your organization's technical capabilities, allowing you to showcase solutions you have delivered to help customers succeed and grow.

New telemetry-based partner capability score model provides you with flexibility to demonstrate your knowledge, skills, and experience.

New customer-facing badges to help you stand out and market your capabilities.

How to attain a Solutions Partner designation

Each area will have a specific number of possible points. You have the flexibility to focus more on one category versus another depending on what is right for your business.

A minimum of **70** points must be earned, with points in each category.

There are **100** points possible in total.

Performance

This category is measured by net customer adds.

Skilling

This category verifies and demonstrates your dedication to skilling and training by intermediate and advanced certifications.

Customer success

This category is measured by usage growth and the number of solution deployments.

Two paths to points: (2) Certified professional associations

- Microsoft certifications are linked to an individual's learning account. To ensure your organization is benefiting from relevant certifications earned by employees, it's important to link the individual's certification to their organization's account in Partner Center.
- Once you've associated an employee with your Partner Center account, have your employees take the following steps:
 - Log in to Partner Center using their work credentials
 - Click on the setting icon at the top right and select Account
 - Go to My Profile and follow the instructions to associate both a Partner University and Microsoft Learning account

Partner capability score: Enterprise and SMB tracks to attainment

Business Applications recognizes partner organizations who work with customers of all sizes. Partners can attain their Solutions Partner designation badge by qualifying through the Enterprise track or SMB track.

- Your organization is automatically categorized into **one of** the two tracks, depending on the number and the size of customers you tend to serve.
- The required criteria for each metric includes **different thresholds** depending on the Enterprise or SMB track for each category of performance, skilling and customer success.
- **Partial points** can be earned in each category, and a minimum of 1 point in each category is needed to reach attainment. There are a total of 100 possible points to earn, while 70 points are required to achieve a Solution Designation.
- Regardless of which track partners qualify, a **single Solutions Partner designation badge** and associated benefits is granted upon meeting the criteria.

¹ Monthly consumption value is defined as the workload consumption (monthly active users or capacity) multiplied by the consumption rate. See docs for full details.

Requirements for Business Applications: Performance

Net Customer Adds: The number of net new customers claimed by or associated with a partner for the purpose of driving deployment and/or adoption of Dynamics 365 and Power Platform services in a trailing 12-month period.

Eligibility path

Initial requirements:

- **For max points (Enterprise track):**
10 Customer Adds (current month adjusted revenue >\$1500 and current month partner attached adjusted revenue >\$0)
- **For max points (SMB track):**
20 Customer Adds (current month adjusted revenue >\$500 and current month partner attached adjusted revenue >\$0)

This indicator's points are calculated for the Business Applications Solutions Partner designation as follows:

- A customer add is when one of the specified workloads is added, via one or more active subscriptions, to the customer during the trailing twelve-month period
- Net customer adds simply counts the number of eligible workloads in a customer tenant across all active subscriptions in the current month, and subtracts the number of eligible workloads in a customer tenant across all active subscriptions twelve months ago
- The adjusted revenue for the workload, summed up across all the active subscriptions for that workload attached to the partner, must exceed \$1500 for the Enterprise track, and must exceed \$500 for the SMB track.
- Multiple partners can get credit for new workloads under the same customer in the same 12-month period
- Net customers are added across all sales channels
- Partial points can be earned for this metric

*All dates and requirements subject to change.

Requirements for Business Application: Skilling

Intermediate Certifications

Relevant role-based certifications are listed below

Advanced Certifications

Relevant role-based certifications are listed below

- For max points (Enterprise track): 7 architects
- For max points (SMB track): 2 architect
- Partial points can be earned for this metric

[Microsoft Certified: Dynamics 365: Finance and Operations Apps Solution Architect Expert](#)

Requirements for Business Applications: Customer Success

Deployments: The number of net new Dynamics 365 and Power Platform deployments services that cross the usage threshold in a trailing 12-month period from customers claimed by or associated with a partner.

Eligibility path

Initial requirements:

- **For max points (Enterprise track):**
5 production deployments, MIN 10,000 monthly consumption value
- **For max points (SMB track):**
10 production deployments, MIN 5,000 monthly consumption value

This indicator's points are calculated for the Solutions Partner for Business Applications designation as follows:

- A **deployment** is when one of the specified workloads crosses the MIN monthly consumption value at the customer during the trailing twelve-month period.
- **New deployments** counts the number of workloads in a customer tenant that have the MIN monthly consumption value in the current month and subtracts the number of workloads in a customer tenant that have the MIN monthly consumption value twelve months ago.
- For **Enterprise track**, each new deployment must cross **10,000** monthly consumption value.
- For **SMB track**, each new deployment must cross **5,000** monthly consumption value.
- For Dynamics 365 workloads this indicator will use association at the **Subscription grain**. For Power Platform and Customer Insights workloads this indicator will use the association at the **resource-level** (not subscription) using the **PAL** association type.
- The resource varies by workload. For Power BI it is a dataset. For Power Apps, it is a production app. For Power Automate, it is a production flow. For Customer Insights, it is Customer Profiles.
- Partial points can be earned for this metric.

*All dates and requirements subject to change.

Requirements for Business Applications: Customer Success

Usage Growth: The amount of Dynamics 365 and Power Platform usage and consumption growth in a trailing 12-month period from customers claimed by or associated with a partner.

Eligibility path

Initial requirements:

- **For max points (Enterprise track):**
Monthly consumption value growth of 30%+ across all customers (vs consumption value baseline > = 50,000)
- **For max points (SMB track):**
Monthly consumption value growth of 45%+ across all customers (vs consumption value baseline > = 50,000)

This indicator's points are calculated for the Solutions Partner for Business Applications designation as follows:

Monthly consumption value growth is defined as the growth of consumption (monthly active users or capacity) multiplied by the consumption rate, across all customer tenants over the past 12 months.

- The monthly consumption value growth indicator compares the total monthly consumption value in the current month against a baseline from 12 months ago.
- Monthly consumption value is calculated at the end of every month.
- For both Enterprise and SMB track eligibility, partners must have a baseline of at least **50,000** consumption value units across their entire customer base 12 months ago in order to attain any points.
- Partial points can be earned for this metric, once the minimum baseline of 50,000 monthly consumption value is attained.
- For Dynamics 365 workloads this indicator will use association at the Subscription grain. For Power Platform and Customer Insights workloads this indicator will use the association at the resource-level (not subscription) using the PAL association type.
- The resource varies by workload. For Power BI it is a dataset. For Power Apps it is a production app. For Power Automate it is a production flow. For Customer Insights it is Customer Profiles.
